ACADEMIC PROJECTS

Interactive Campus Map, *(Guide: Dr. M.B. Chandak) - Link*
- A dynamic webpage which displayed a mash-up of map and information of a small region/area. Implemented the project on college campus.
- Implemented the project on a MVC framework, Django, and used Google Maps API. Mainly worked on the object-relational mapper and admin interface.

Meta Search Engine in Python, *(Guide: Dr. M.B. Chandak) - Link*
- Fetch search results from Google, Yahoo and Bing to provide comprehensive search results.
- Algorithm implemented based on research done in Sardar Patel University.

CodeJudge - An Online Judge System, *(Guide: Prof. M. Wanjari) - Link*
- Creating a centralized Online Judge System, which serves for the automatic assessment of user-submitted programs in programming contests.
- The compilation system was executed on a separate application written in Java. PHP was used to render the web pages.

TECHNICAL SKILL

Operating Systems: Ubuntu, Windows.
Languages/Frameworks: Python, Django & Pyramid Framework, Java, HTML5, CSS, Bootstrap framework, JavaScript, jQuery.
IDE/Text Editors: Eclipse IDE, Sublime Text.
